VIJAY RAJESH R

AI Engineer

+91 73737 07055 | vijayrajeshr@gmail.com | vijayrajeshr | github.com/vijayrajeshr | Tamil Nadu, India

Technical Skills

Programming and AI: Python, Gen-AI, RAG, Ollama and Hugging Face Models, LM Studio, Claude Code
Cloud & Ops: AWS, Git, GitHub, CI/CD, Cloud Advisor
LLM & NLP: Llama 3.2, Qwen 3, Deepseek-R1, Fine-tuning LLMs, Model Context Protocol (MCP)
Other Skills: Open Source Intelligence (OSINT), N8N, Strategist, DBMS, Prompt Engineering

Education

Vellore Institute of Technology
B.Tech in Artificial Intelligence and Machine Learning **CGPA: 8.63**

Projects

InTopacle-VR: Architecture Proposal for INFOSYS Topaz-Finacle **Oct 2026 – Present**
- Reimagined AI-to-core-banking integration so the LLM never sees raw account numbers or holds write credentials, making silent parameter mis-binding structurally impossible.
- Ensured Finacle executes only database-verified, cryptographically signed payloads, keeping the core protected even under prompt injection or full AI-layer compromise.

E.V. – Personalized Agentic AI with OSINT **July 2026 – Present**
- Built an autonomous AI agent combining LLMs, OSINT and real-time intelligence gathering via OpenRouter API, N8N and SerpAPI.
- Automated pipeline in n8n to query, extract, and structure open-source intelligence with minimal manual intervention

SentinelOps-AI: Autonomous AI Agent on AWS **Feb 2026 – Present**
- Monitors runtime logs in AWS CloudWatch inside the cloud to detect application crashes and immediately routes alarm events using Amazon EventBridge; Also Integrated Model Context Protocol (MCP)
- Fetches error logs, isolate root causes, and run test suites in a safe sandbox.
  This project will be proposed to AWS Team soon and will be provided as SaaS.

DocuSense-AI: Semantic Document Intelligence **Aug 2025 – Oct 2025**
- Built a multi-modal RAG pipeline to index, process, and extract insights from complex unstructured documents and PDFs
- Local Model Implementation using Llama Models, pairing local embeddings with an embedded vector store to deliver low-latency, hallucination-free querying without external API dependencies.

Professional Experience

Cloud Solutions Lead (Remote) **Dec 2025 – Present**
Olcademy
- Team Lead; Project and Git Management; I have led a team to architect and deploy resilient cloud solutions to the projects.
- Audited legacy projects and system architectures, identifying critical bottlenecks and vulnerabilities to drive systematic performance and stability improvements.

Data Analytics Trainee (Remote) **Jul 2025 – Aug 2025**
MedTourEasy
- Assisted with healthcare technology projects and also implemented RAG on health care records with N8N.

Analyst and Volunteer (Remote) **Jun 2025 – Jul 2025**
Pawzz Foundation
- Team Lead; Decision Making and strategy building; Data Visualization; Analyzing trends and data and Idea Proposals over team meeting;
- Ran outreach across 5 events, reaching 1000+ individuals.

Certifications

- Oracle Certified Gen AI Professional
- AWS Certified Cloud Practitioner
- Google Data Analytics
- ANTHROPIC – Claude Code in Action
- IBM Machine Learning
- ANTHROPIC – Claude

Achievements

Created a Software for BPCL **2026**
- Built a resource management system for a BPCL agency in Tamil Nadu.

Founder, Black Sky (Tech Organization) **2026**
- Assembled and lead a high-performing team building Agentic-AI projects.
