

VIJAY RAJESH R

- AI Engineer -

+91 73737 07055 • vijayrajeshr@gmail.com • [linkedin.com/in/vijayrajeshr](https://www.linkedin.com/in/vijayrajeshr) • github.com/vijayrajeshr • Tamil Nadu, India

Technical Skills

Programming and AI: Python, Gen-AI, RAG, Ollama and Hugging Face Models, LM Studio, Claude Code

Cloud & Ops: AWS, Docker, Git, GitHub, CI/CD, GitHub Actions.

LLM & NLP: Llama 3.2, Qwen 3, Deepseek-R1, Fine-tuning LLMs, Model Context Protocol (MCP).

Other Skills: Open Source Intelligence (OSINT), N8N, Strategist, DBMS, System Design

Education

Vellore Institute of Technology

B.Tech in Artificial Intelligence and Machine Learning

CGPA: 8.63

Certifications

- Oracle Cloud Infrastructure Certified Gen AI Professional
- AWS Certified Cloud Practitioner
- Google Data Analytics
- Anthropic - Claude Code in Action
- Anthropic - AI Fluency
- Anthropic - Claude

Professional Experience

Operations and Dev Intern

Dec 2025 – Present

Olcademy

Remote

- Architected and deployed cloud-based AI applications using AWS Lambda and Docker; implemented CI/CD pipelines via GitHub Actions
- Engineered scalable solutions reducing latency by 35% and cloud costs by 20% through performance optimization
- Developed Python automation scripts with AWS Lambda for infrastructure management, eliminating 40% manual overhead

Data Analytics Trainee

Jul 2025 – Aug 2025

MedTourEasy

Remote

- Built data pipelines for healthcare datasets using Python; created dashboards for stakeholder reporting
- Optimized data workflows; accelerated report generation by 25% and improved data quality by 18%

Analyst and Volunteer

Jun 2025 – Jul 2025

Pawzz Foundation

Remote

- Drove 20% increase in donor engagement via targeted digital campaigns using analytics-driven strategies
- Executed outreach strategy reaching 1000+ individuals through 5 events; expanded foundation's digital presence

Strategist

May 2025 – Jul 2025

InAmigos Foundation (IAF) - NGO Based

Remote

- Led 3+ campaign strategy plans resulting in 30% boost in outreach response and community engagement
- Collaborated with 4+ stakeholders to implement awareness strategies and organizational initiatives

Projects

E.V. - Personalized Agentic AI with OSINT Technology

July – Present

- Engineered autonomous AI agent leveraging large language models, OSINT capabilities, and real-time intelligence gathering using OpenRouterAPI, N8N, and SerpAPI

SentinelOps-AI: Autonomous AI Agent powered by AWS

Feb 2026 – June 2026

- Built autonomous AI agent powered by Amazon Bedrock (Claude 3.5 Haiku) and MCP servers for AWS CloudWatch runtime monitoring, without manual or human intervention

AWS-Based Text Summarizer AI: Serverless Pipeline

Sep 2025 – Nov 2025

- Developed serverless AI pipeline using AWS Lambda for automated text extraction and summarization
- Implemented continuous deployment via GitHub Actions for production-grade reliability

DocuSense-AI: Semantic Document Intelligence

Aug 2025 – Oct 2025

- Built semantic document analyzer using Llama models and FAISS embeddings for intelligent document classification, supports open-source models

Achievements

BPCL Software Engineering

2026

- Created Software for Resource Management for a BPCL Agency in Tamil Nadu.

Created an Organization - Black Sky

2026

- Gathered and led best individuals into a Team, Working on Agentic-AI projects.
